

## Optimal drug therapy in newborns and children

*Improve your skills to choose, prescribe & evaluate drug therapy in children*

EBN pre-congress course at the virtual EAPS 2020

Wednesday, 14 October 2020

### Goals

To provide an overview on what is important when drugs are prescribed to newborns, to learn about special conditions and to understand how drug therapy in newborn infants can be optimally provided, where we will translate to and focus on daily practice.

Chair: Robert Flint and Sinno Simons

### Programme

13:00-13:20	<b>One dose fits all? Introduction pharmacology</b>	John van den Anker
13:30-13:50	<b>What about the kidneys?</b>	Karel Allegaert
14:00-14:30	<b>Do you understand commonly used drugs? Examples from daily practice - Interactive session</b>	Robert Flint/Sinno Simons
14:30-15:00	<b>Coffee break</b>	
15:00-15:20	<b>Hypothermia and pharmacology</b>	Anne Smits
15:30-15:50	<b>Antibiotics and TDM</b>	Pieter de Cock
16:00-16:30	<b>How to improve your evaluation of pharmacotherapy tomorrow? Interactive session</b>	Robert Flint/Sinno Simons
